PROFESSIONAL SUMMARY

Technologically versatile Computer Engineering graduate (Distinction) specializing in Artificial Intelligence and Full-Stack Development. Proven expertise in architecting scalable AI systems using Python (FastAPI) and Flutter, with a focus on high-impact solutions such as revenue prediction, enterprise-grade business automation (AURA), and proactive cybersecurity anomaly detection. Committed to engineering excellence, bridging the gap between theoretical AI models and practical, production-ready software for international markets.

PROFESSIONAL EXPERIENCE

Software Developer

Cab Yetu *Sept 2025 – Feb 2026*

- Developed and tested core application features using modern engineering practices.
- Contributed to the design and implementation of scalable system architectures.
- Ensured high performance and responsiveness of software solutions.

ICT Developer

Kenya Bureau of Standards (KEBS) *Jan 2025 – Aug 2025*

- Maintained and optimized internal ICT systems in a professional corporate environment.
- Applied specialized software engineering practices to real-world systems.
- Collaborated with cross-functional teams to deliver secure and efficient tools.

KEY PROJECTS

AI Revenue Curve System

Repository

Full-stack AI system (Flutter + FastAPI) for revenue prediction. Designed robust APIs for real-time analytics and dynamic data visualization. Improved business forecasting accuracy through machine learning models.

AI Business Assistant (AURA)

Repository

AI-powered assistant providing business insights and decision support. Implemented an intelligent response system for market analysis and data-driven strategy development.

AI Cybersecurity System

Repository

AI-based anomaly detection system for network security. Built features for real-time monitoring and proactive threat detection using advanced AI models.

EDUCATION

Diploma in Computer Engineering (Distinction)

2023 – 2025

Thika Institute of Business Studies

Kenya Certificate of Secondary Education (KCSE)

2022

Kiburu Boys High School
